

GX AUTO PRINTER

GX AUTO PRINTER • Entry-Level Automated Disc Printing

When you're publishing worship services, wedding ceremonies, sports events, training presentations, and audio and video performances to disc, you want to make sure that the final product—the disc—looks truly professional. Printing sticker labels to place on discs doesn't meet this objective, plus it's *beyond* tedious. And outsourcing direct-to-disc printing can be time-consuming and wildly expensive. This is why Microboards Technology has an automatic entry-level disc printing solution designed to meet your needs quickly, easily, cost-effectively—and in the comfort of your office.

Designed to print up to 50 CDs, DVDs, or Blu-ray Discs at a time, the GX Auto Printer is the ideal desktop device for low-volume runs. The process is automatic and nearly effortless, with the printer doing the work for you. Plus it's affordable; at only 23 cents per disc, you can upgrade from labels without spending a fortune. And because the printer is only 11.5 inches wide, you can position it virtually anywhere in your office or on the desktop for easy, immediate access.

With the GX Auto Printer, you can expect to see professionally finished discs that, quite simply, look incredible. The technology we use to handle each disc is proven to reduce vibration during the printing process, creating a smoother, cleaner finished image. HP inkjet technology, with HP Vivera inks and the highest resolution (4800 x 1200 dpi) in the industry, works in sync with our handling technology to achieve outstanding results. So whether you're printing discs with full coverage or light text only, you're certain to see brilliant, long-lasting color on each and every disc.

Take advantage of this opportunity to assume greater control over your digital content with an automatic disc printer that adds flair to your discs and professionalism to your endeavors. The GX Auto Printer sets you on that path, and Microboards Technology backs you all along the way with its quality service and second-to-none technical support team.

- Part No.:** GX2-1000
- Disc Input:** 50
- Typical Weekly Throughput:** 25-100 Discs
- Print Speed:** About 60 seconds for full-color, full-coverage disc on Photo Best Mode; 15 seconds for black text on Normal mode
