Why PrintWrite 2?

PrintWrite 2 disc publishing software brings all current Microboards disc publishers to life with ingenious new features and a simplified one-screen interface. Designed by Microboards engineers for use with the G4, MX-1, and MX-2 Disc Publishers, users will take satisfaction knowing PrintWrite 2 software for the PC is working specially for their needs. Narrow down exactly what you want your publisher to do—whether that means burning a stack of DVD Videos, printing labels on your latest audio CD,

or making hundreds of copies of crucial data on Blu-ray Discs. PrintWrite 2's powerful tools make any disc production job painless. With the latest interface, users can clearly see all aspects of a production job in one enhanced pane, with several pop-out tabs for more in-depth publisher and job information.

Microboards

PrintWrite2 Job Types

Create an Audio or Data CD; a Video or Data DVD; or one of many other job types, including disc image creation, batch copying, print-only jobs, and disc erasing. Working side-by-side with SureThing Label Designer software, users can easily create custom artwork for high-resolution, full-color disc labeling.

Networking Capabilities

Now owners of a Microboards disc publisher can operate or share the unit remotely over a network. PrintWrite 2 boasts the industry's fastest Remote Scan to locate a publisher on your network. The selected publisher will receive and process jobs in the order they are submitted, making it easy for users to locate their finished product in the publisher's output bin. PrintWrite 2 allows an unlimited number of clients per location, so there's no need to purchase blocks of licenses. It also features the ability to connect to multiple publishers on a network and run multiple jobs concurrently. Full administrative capabilities are given for allowing and blocking remote clients to the publisher. Microboards PrintWrite Monitor allows for job status messaging to come through to the client's desktop without PrintWrite2 being open.

Compatible Products

PrintWrite 2 is functional with all three currently-produced Microboards disc publishers—the entry-level G4, the MX-1, and the high-throughput MX-2.
