

For a more in-depth look at the duplication process and menu structure, please refer to the appropriate sections of the User's Manual.

QDL-1000 Initial Setup

1. Unpack the QDL-1000 Disc Duplicator and place it in the selected workspace. This space should be level and have enough space to allow for the extension of the Input/Output bin assembly.
2. Plug in the AC power cord to the back of the QDL-1000 Disc Duplicator.
3. Pull out the Disc Tray using the front handle until the tray locks into place.

4. Turn on the QDL-1000 Disc Duplicator using the switch on the back.

Using the QDL-1000 Disc Duplicator Autocopy function

1. Load your blank media into the input bin.
2. Load your Master Disc on top of the blank media.
3. Flip the disc slide up towards the recorder drive. This slide is used to direct the burned discs into the output bin. 
4. Use the **Up** or **Down** buttons to navigate through the menu until the display reads **15. Autocopy**.
5. Press the **OK** button to begin duplication of your Master Disc.
6. When the blank discs have all been burned, remove the discs from the output bin. Don't forget that your Master Disc will be the bottom disc in the stack.

For more advanced duplication options and information on the menu functions, please refer to the User's Manual.

Attention

For best results, use CD or DVD discs that have a matte or smooth printable surface. A sample pack of appropriate discs has been provided with this unit.

Shiny silver or laquered discs may not unload to the output bin correctly due to their sticky surface, and are not recommended for use with this product.
